### Mandviwalla's Tips for your Trips

The Summer Sun can **will** be brutal. Can't wait to get in your car and turn the a/c on full. However, your plastic dashboard and interior materials are made from chemicals that emit harmful gases when under the sun. Upon entering the vehicle, open your windows and wait at-least 3 minutes before turning on your Air-conditioning to allow these gases to leave the passenger compartment.

### Mandviwalla Car Care

Feeling the heat already? Your Car feels the same way. Just like cold water on your face feels nice, so does a **REAL Pre-mixed Long-Life Coolant** to your car's engine. Keeping your car cool during summer not only will keep the engine running at the right temperature, avoiding overheating, but also give you better fuel economy and better air conditioning performance.

From Yours Truly,
